OBJECTIVE

Passionate and self-motivated Frontend Developer with expertise in HTML, CSS, JavaScript, and React. Bringing prior experience in the mechanical field, I am eager to transition into the IT sector as a Frontend Developer. I am committed to contributing to innovative projects while expanding my knowledge and skills in web development.

PROJECTS

- **Quiz Application** [Preview](#)
Built a quiz application using React with multiple-choice questions. Users can easily navigate through questions, choose answers, and view their results. The app uses JSON for question management and provides a smooth, responsive experience
- **News application** [Preview](#)
Developed a news application using React that fetches and displays the latest news by making API calls. Implemented features for real-time news updates and user-friendly navigation, ensuring a dynamic and responsive interface.
- **Country info** [Preview](#)
Developed an informational application about countries using HTML, CSS, JavaScript, React, and Redux. Implemented features such as a search bar for finding specific countries and a filter to sort countries by continents.
- **Rock, Paper, Scissor** [Preview](#)
Developed a responsive rock-paper-scissors game using React and JavaScript.
